Because complex systems need a simple integrative solution

A powerful HCM must first be an accommodative one. That's why issues of compatibility and integrity are a top priority. Adrenalin is built to integrate effortlessly with any software currently in use, facilitating seamless cross-over and integration across various backend channels, ERP systems and finance/payroll systems. Just plug Adrenalin in with any system watch it transform your business.

adrenalin™

Transformative Digital HR

- Assure employee record consistency across systems by eliminating manual data entry and loss of information

- Systematize management of employee data from Adrenalin HCM solution to downstream back office systems

- Reduces HR and implementation cost

- Ensure lowest total cost of ownership among comparable systems

> "Adrenalin was chosen as the preferred HR Solution for its Payroll functionality covering the GCC countries. We are very pleased that the Adrenalin integration with Workday has become a reality and without adrenalin we would not have achieved our objective. We believe that this seamless integration will help Lafarge Holcim in the further automation of our HR functions.
